

Must be ready before your sprint 3 evaluation:

- 1. One doctor with username: **evaldoc** that has 5 upcoming appointments one of them is on the date and time of your evaluation with a patient with username: **evalpatient**.
- 2. Doctor **evaldoc** also has one completed appointment with patient **evalpatient**, this appointment has one unfilled prescription.
- 3. Doctor **evaldoc** has also 4 completed appointments, all 4 appointments have prescriptions (2 of them unfilled and 2 of them are already filled).
- 4. Doctor **evaldoc** has one followup request from patient **evalpatient**.
- 5. Other 5 doctors (all different specialities) with at least one upcoming appointment, one canceled appointment, one completed and one rescheduled appointment.
- 6. All doctors created has at least 5 available slots
- 7. Patient **evalpatient** has one upcoming appointment with doctor **evaldoc** and 1 completed with doctor **evaldoc** (refer to point 1 and 2) as well as 2 other upcoming appointments and 2 completed with other doctors.
- 8. Patient **evalpatient** has 2 linked family members 1 was already registered and 1 was unregistered.
- 9. Patient **evalpatient** has money in his wallet (enough to book appointments)
- 10. Patient **evalpatient** has one unfilled prescription from doctor **evaldoc** (refer to point 2) as well as 2 other prescriptions from other doctors that are filled.
- 11. Pharmacist with username: **evalpharm** .
- 12. Pharmacy system has at least 15 different medicines, 2 of them are out of stock and 5 of them are **NOT** over the counter.
- 13. Do some transactions on the pharmacy system, so that we can check the sales report.
- 14. Sign up for 2 doctors and let their contracts pending (i.e we will accept one and reject one at the evaluation)
